## COMPREHENSIVE RECOMMENDATIONS

| Category        | Recommendation  |
|-----------------|---|
| SEO & Content   | ✓ Meta description present - ensure it's compelling and keyword-rich    |
|                 | ✓ Add ALT text to 1 images for accessibility and SEO                    |
|                 | ✓ Create descriptive, unique titles for each page (50-60 chars)         |
|                 | ✓ Write engaging meta descriptions with target keywords (150-160 chars) |
|                 | ✓ Use internal linking to improve crawlability and user navigation      |
|                 | ✓ Reduce bounce rate with engaging above-the-fold content               |
| User Experience | ✓ Ensure mobile responsiveness across all devices                       |
|                 | ✓ Ensure clear navigation hierarchy on all pages                        |
|                 | ✓ Design mobile-first experience for growing mobile traffic             |
| Performance     | ✓ Website performance is slow - consider image optimization and caching |
|                 | ✓ Optimize images (compress, use modern formats like WebP)              |
|                 | ✓ Implement lazy loading for images below the fold                      |
|                 | ✓ Enable GZIP compression to reduce file transfer sizes                 |
|                 | ✓ Minify CSS and JavaScript files to reduce load times                  |
|                 | ✓ Use browser caching to improve repeat visitor load times              |
| Technical       | ✓ Reduce server response time through database optimization and caching |
|                 | ✓ Implement structured data (Schema.org) for better rich snippets       |
|                 | ✓ Implement SSL/HTTPS for secure data transmission                      |
|                 | ✓ Use readable fonts (minimum 16px for body text)                       |
|                 | ✓ Implement a clear call-to-action (CTA) strategy                       |
